## Adaptive Physical Education Program

## The Description Of The Process

1. The process to identify students shall begin in the health office. A student may be identified by the school nurse, physical education teacher or Building Principal.
2. The referral form is to be completed by the school nurse. On that form the school nurse will identify the student as permanently or temporarily handicapped as well as the reason for requesting adaptive physical education.
3. Once completed by the school nurse the referral form is sent to the Building Principal for approval. If the Building Principal approves the referred student, the form will then be sent by him to the Supervisor of Physical Education.
4. The supervisor of Physical Education will then evaluate the need for an adaptive physical education program. If the program is disapproved, the process stops, and the student remains in the regular physical education class. If it is approved and the student is permanently handicapped the form will then be sent by the school nurse to the Committee on Special Education. A permanently handicapped student will be identified as needing adaptive physical education for an entire school year. A temporary handicap is a disability beginning from 2 weeks but less than 1 year. If the student is identified as temporary and approved by the Supervisor of Physical Education for an adaptive program, the referral form will be sent back to the school nurse to initiate the program. All students with disabilities of less than 2 weeks will remain in their regular physical education class. Also, students with a temporary disability will remain with their regular class until all paperwork is complete. Upon completion the change in the student's schedule will be made.
5. For students identified as temporary handicap and who have completed the approval process the school nurse will then send out the physician's and parent's consent form. Upon receiving the forms the school nurse will give a copy of each to the student's physical education teacher. The physical education teacher will develop an individual educational program based on the student's physician's recommendation. A copy of the program shall be sent to the Supervisor of Physical Education. All programs are to be recorded on departmental forms and a folder maintained on each student. A parental update will be given every 10 weeks.
6. For students identified as having a permanent disability, the forms is sent by the school nurse to the Committee on Special Education. The committee, if it approves the referral, will send out the parent consent and physician's recommendation forms. Upon receiving the forms, the committee will send the forms to the school nurse. At that point, the school nurse gives a copy to the physical education teacher, who develops an individual education program. The physical education teacher sends a copy of the program to the Supervisor of Physical Education.
7. No students will be allowed to begin an Adaptive Physical Education Program until the entire process has been formally accepted.

# COLONIE CENTRAL SCHOOL SYSTEM RECOMMENDATION FOR A MODIFIED PHYSICAL EDUCATION PROGRAM DEGREE OF PARTICIPATION 

## MEDICAL CERTIFICATION OF LIMITATIONS

## TO THE PHYSICIAN:

All pupils must participate in the physical education program just as they do in other aspects of the academic program; physical education is a required subject area( Education Law, Article 17, Section 803). It is equally as important at the elementary level as at the secondary level. Each pupil capable of attending school can take par in and benefit from a physical education program. If a pupil cannot participate fully, then the physical education program will be modified based upon individual needs and be appropriate to the student's age.

Our program can be modified to satisfy individual needs. You may be assured that if you acquaint us with the facts we will provide your patient with a properly modified program. We appreciate your cooperation in checking the type of physical education you believe best satisfies the needs of your patient.

Please complete this form and either mail it to the child's school or give the completed form to the child to return to the school nurse.

Sincerely,
Jason Semo
